

Flu Vaccination Reminder

A friendly reminder that we are heading once again into the Southern Hemisphere's flu season. The medical world becomes more concerned each flu season, as new more virulent and resistant flu virus strains evolve.

The modified Southern Hemisphere flu vaccine is now available at International Medical Clinic.

The vaccine is made up of the following strains:

- ***A/California/7/2009(H1N1)***
- ***A/Perth/16/2009(H3N2)***
- ***B/Brisbane/60/2008***

This vaccine currently offers significant protection against flu.
